About This Software

ShareX is a free and [open source](#) program that lets you capture or record any area of your screen and share it with a single press of a key. It also allows uploading images, text or other types of files to over 80 supported destinations you can choose from.

ShareX supports many ways to capture or record your screen. The main capture methods are:

- Fullscreen
- Active window
- Active monitor
- Window menu
- Monitor menu
- Region
- Region (Light)

-
- Region (Transparent)
 - Last region
 - Custom region
 - Screen recording
 - Screen recording (GIF)
 - Scrolling capture
 - Webpage capture
 - Text capture (OCR)
 - Auto capture

There are many configurable screen capture settings such as showing the cursor, transparent window capture, delayed capture, multiple region selection with different shapes, etc.

After the capture the following automated tasks can be executed:

- Show quick task menu
- Show "After capture" window
- Add image effects / watermark
- Annotate image
- Copy image to clipboard
- Print image
- Save image to file
- Save image to file as...
- Save thumbnail image to file
- Perform actions
- Copy file to clipboard
- Copy file path to clipboard
- Show file in explorer
- Recognize text (OCR)
- Show "Before upload" window

-
- Upload image to host
 - Delete file locally

For example, the captured image can be opened in image editor and after that, the image can be automatically saved to the hard disk and uploaded to your destination of choice.

ShareX allows you to upload any type of files with these methods:

- Upload file
- Upload folder
- Upload from clipboard
- Upload from URL
- Drag and drop upload
- Upload from Windows shell context menu
- Upload from Windows send to menu
- Watch folder

After the upload, any of the following automated tasks can be executed:

- Show "After upload" window
- Shorten URL
- Share URL
- Copy URL to clipboard
- Open URL
- Show QR code window

For example, the uploaded image URL can be automatically shortened using one of the 15 URL shortener services and the shortened URL can be copied to the clipboard.

ShareX also comes with a few simple productivity tools:

- Color picker
- Screen color picker
- Annotate image

-
- Image effects
 - Hash check
 - DNS changer
 - QR code
 - Ruler
 - Directory indexer
 - Image combiner
 - Image thumbnailer
 - Video thumbnailer
 - FTP client
 - Tweet message
 - Monitor test

ShareX has an advanced hotkey system which allows you to use any of these capture methods, upload options or tools with their own task settings. These are called "Workflows". Workflows allow each hotkey to have its own after capture tasks, after upload tasks, destination etc. For example, you can set your screen recording hotkey to upload to a specific destination, bypassing the default destination. This way, only videos will be uploaded to this configured file destination.

best game of the year. In less than a day I've spent about seven hours on this game.

Love the game, love the idea of companionship and working together. I can always pair up a group of friends or just have me and my boyfriend play together. A lot of people complained about toxicity I believe... To me I don't really understand how a game like this could be toxic if you can't even communicate throughout the game. The only sort of communication you get is before the game (you get a minute to ready up when there's a whole squad of survivors) and after the game if you stay.

I haven't played as a killer yet because I'm scared of the result, but I think I'm going to go for the tutorial and try playing as a killer after this review. Honestly, for the price I got it for (10 bucks for the sale), it's totally worth it. Once it goes back up, I recommend really thinking before you purchase, considering some factors:

- some people may disconnect the game
- some people may have no idea how to play
- some people may intentionally have you get killed.

(Could be considered still as toxic/frustrating, but could easily be flipped over if you got some cool buddies to play with)

All in all, I recommend the game because it is fun to play with friends or other people. I'm more of a person who enjoys to play with other people. If you like Deceit, I recommend this game.

P.s: Don't complain about a game being toxic when you can't even communicate throughout the game and your biggest threat is another player disconnecting. And, what game doesn't have any toxicity?

UPDATE

Playing as a killer in this game is pretty rough, you do get a lot more currency though to upgrade characters. I can see the toxicity towards the killers because of the perks (if the killers chose to unlock their perks). I did realize in my first game I wasn't able to kill anybody with one character, so I tried another. In my second game I did kill and "sacrifice" three individuals. At the end of the game a few told me that camping isn't the right way to win a game, (Ironically, I ran across the whole map multiple times like an idiot). After explaining to them that this indeed was my second match as a killer and my first time using this killer they apologized and laughed about it with me.

Communication is key during the game at the beginning and most certainly at the end. I could of got reported or worse, but luckily I didn't. I also realized that the game does crash on you so you will disconnect, it's not like people intentionally disconnect.

Anyways, thanks for reading my review!!!. well, you need to have the program installed in a specific named local computer location- right now as installed thru Steam- it cannot find the sample files, let alone milkshape models on my computer.

Another problem is the Convex hull creation- I saw how to make a cube and was able to carve it- YOU as designer need to improve the tool menu so WE as buyers can see what you have designed. It may be a useful tool- but it is just a guessing game at the moment- and not in a good way.

Otherwise good luck to you- I see your sample video and pics- it is working on YOUR computer. Try to think out of your box and let purchasers like myself use your application- who knows we might pay more for a updated app!. Having shied away from purchasing further Steam locomotive DLC due to past dissapointments in performance and simulation quality (not from Victory Works), I was extremely interested in this particular model due to the apparent painstaking efforts taken by the modelers to provide a Steam locomotive that is more akin to what I have always wanted in Train Simulator but have repeatedly been foiled.

All I can say is WOW! Victory Works, I tip my hat to this most excellent production, you have indeed set the bar for all other Steam locomotive modelers. Finally when I am on the foot-plate I really feel like I am on the footplate. Being somewhat hardcore, I only have used the locomotive in Advanced mode thus far, but can attest that all control scripting works equally well with Raildriver or keyboard.

The little touches are great but finally we have two additions to Steam simulation which I believe are real winners and the way forward here:

1). Steam Chest pressure gauge - Virtual steam chest pressure means that you now have visual feedback on the tractive effort being applied, and you need that gauge because with it we finally have a steam locomotive that models wheel-slip, both visible and audible.

2). A graphical representation of the fireman's shovel, this is more practical than it sounds because it is used to both set and indicate the amount of firing effort being applied, my previous experience was that there was no real indication of firing rate; you could change it via mapped keys, but there was no graphical feedback apart from messing around with HUD settings.

This locomotive is challenging (in advanced mode), but the rewards of mastering these challenges give you a great sense of satisfaction.

The only criticism I could think of was that the provided scenarios begin with a full boiler, as a result it is imperative that you leave those cylinder valves open until you begin to see a gap appear in the sight glasses, and if you are in doubt you can always perform a blow-down check to be certain. Failing to keep the cylinder valves open for a while initially, will have catastrophic results. Other than this small gripe I can honestly say that this locomotive is going to be a tough act to follow by other modelers.

Again, I must stress that do not have much in the way of Steam Locomotive DLC, as such I may have missed on other quality model simulacra, but when the only option is to "pay your money and take your chances", I decided to stop taking further chances period. Thus I qualify my above remarks; it may be that there is other Steam Locomotive DLC out there that is an equal to this, but not to my limited knowledge.. **Pros:**

- Price
- Easy achievements
- Fun
- Nice music
- New stages are being added

Cons:

- Music stops if you are on the same stage for a while
- Achievements only unlock once you exit the game
- Mouse glitch at the end of some levels (but can be easily fixed)

Conclusion:

I'm an achievement collector and this is basically why I bought the game, but I don't think my money was wasted, as I played the game for about 3-4 hours which is good for the price, thus I recommend it. The Shadow Operations Unit DLC for Beat Hazard adds several new ships to choose from, each with their own strengths and weaknesses. It also adds a new Shadow Ops mechanic (hence the name), in which you have to complete missions for each ship in order to earn stars and increase your Shadow Ops rank. The missions go from simple stuff like killing a certain enemy a certain number of times, to stuff like finishing a track on the hardest difficulty with no deaths.

This DLC also includes an ingame editor so you can create your own ships and upload them to the Workshop, by adjusting their stats like firing and movement speed, size, and so on. The only issue I'd have with it is that you have to choose a file from your computer for the ship's appearance (otherwise it'll be a default red ship with the word "TEST" written on it); I think it'd have been better if it had an easy to use ship editor, where you could select parts and attachments.

All in all, I think this is a pretty good DLC. The Shadow Ops missions are a great way to spice up the game. I recommend it.. Where is Tak

Also good price for some lil sweet sweet games but it'd be even better to also get if not the source a cheatsheet with formulas or brief explanations about the awesome procedural visuals you all make. There is an absolutely astounding amount of talent put into these pieces, love you guys' work.. OK so this is Breakout with a couple twists. But the twists turn what could be a boring experience into a fun casual twitch game. This is a game that you can waste a few minutes with and unwind. It is single player ONLY so no interaction, but sometimes thats a good thing...

I'm a huge ship enthusiast, and this is definitely a grab! I couldn't get myself to stop playing after 14 hours, no game has ever done that for me in 7 years!. When I tried Painkiller back in 2004, it was a fast, beautiful and fun game. It still is. Imagine the fast gameplay of Quake and Unreal Tournament, mixed with a lot of fun weapons, innovative level design and atmospheric sound and art direction.

On top of this, it has a very good single player campaign which brings you to a lot of different places, which only gets more weird in the excellent Battle out of hell expansion included in the black edition.

It seems age has been kind to this game, and if you haven't tried this game before and are at least mildly interested in single player shooter games, then Painkiller comes recommended.. Yet another free update for The Surge.. More, armors, and weapons.. Always welcome! Especially for such a good game! Maybe more bosses next?. I think this is a great game. I own it both on Switch and PC; countless hours wasted and enjoyed!. Very cute and not overly easy to win. With the various achievements its a fun little game at the price.. This game has great potential to be an awesome C&C style game.

At the moment It feels bare bones. Standard units, sound, layout, graphics. Nothing major.

Lots of things can\must be added. Rotating camera angles. Both hand controls usable. Upgrade in graphics and sound. just hope the developer hasn't given up on it.

I agree with some others that it should still be in an Early Access stage though.

But as it stands, it's worth a blast.. This game Rocks!!!!

- 1 its original
- 2 its addictive
- 3 very funny
- 4 great price

online is coming. imagine and dAY WITH MORE KNIGHTS MORE LEVELS BIGER LEVELS
AAAAAAAAAAAAAAAAAAAAHHH BUY THIS GAME!!!!

. The story, the gameplay and the RTS aspects are terrible. I enjoyed the comic book art that pushes the story forward, but that's about it. As a kid I loved 1C's games, but for me this is definitely their worst title, even when this game is set in my most favorite setting - the post apocalyptic world. <http://steamcommunity.com/sharedfiles/filedetails/?id=792119811>
<http://steamcommunity.com/sharedfiles/filedetails/?id=793254106>. What to say about this apawling excuse for a "heavy goods" engine. Slips more than a cracked up squirrel on ice. Can't not handle 1000 ton trains like the real one can. No head code selection at all. sounds are horrid. No BR green livery or a mention of Evening Star. Even the model is flawed to the point where the tender body and chassis will become 2 separate objects not to mention the valve rods are set too low so they poke through the bottom. I can go on and on but the main point is just avoid this complete disgrace of an engine which does nothing to show the true power of the real machines if you want an amazing heavy goods engine I highly recomend the USATC S160.. Its poor everything about it the slowness of character the rubbish puzzles its just poor sorry.
