About This Game

Thin Judgment sets you in front of a conveyor belt. Many things appear on the line. Ranging from spare change and suspiciously clean food, to gold bars and sentient little-paper-people that have a tendency to explode. Try not to die – avoid explosions, being "fired," mind what you're picking up, and remember to eat after working hard.

DISCLAIMER: Button mashing plays a monumental role. If you have weak fingers, be warned.

The Conveyor

Earn your wage by collecting spare change or collecting paper people with your tube. Feel free to analyze and prejudice which paper people you collect, as each of them has their own social status and gender. There are over 50 different social statuses and text-based events may occur based on the balance/imbalance of roles and genders. There are some malicious roles as well, so be careful not to let destabilizing people join your perfect little-paper-society. Use money to purchase shipments of basic items.

Earn resources by collecting gold bars or letting the paper beings endure a slow and agonizing death in the furnace that's at the end of the conveyor belt. Letting paper people die doesn't have any considerable implication, but letting gold bars go into the furnace will make your employers very upset with you. Unless you collect those gold bars, you won't be employed to anybody for very long. Use resources to place shipments of paper people in bulk.

There are various other items that appear on the conveyor belt which you can pick up.

- Food

Apples and Lemons. What a good selection of nutrition.

- Drugs

Marijuana. Medical, of course. Slows down the perception of time for a short period.

- Bandages

How else will you stop the bleeding?

- Gasoline

Pour it over the conveyor belt and watch everything around it burn!

- Caltrops

The only item that cannot be picked up. Attempting to pick them up will result in a sharp pain and some blood loss.

The Experiments

When you want to divert from the typical conveyor belt mayhem, then switch over to one of the 3 experiment mini-games. You need paper people to experiment on, so collecting enough at the conveyor belt is necessary.

- Ground Race

Great for watching the paper people stumble and fall on their face. Control one of the 4 paper people and get to the end first.

Avoid obstacles by jumping and moving.

- Rock Climbing

Stop the paper people from climbing to the top. Knock off all but the golden paper people, as the golden ones fall up and are harmless if just climbing.

- Tube Operator

Switch tubes on and off to prevent them from overheating as paper people travel through them.

In this game, you collect items from a conveyor belt. The 'goal' of this game I guess is to collect enough paper people so that you can have play with them in experiments, while making sure you don't forget to pick up gold bars and defuse detonating paper people so that you don't die.

I have quite a few criticisms to say:

1. The mouse controls makes this game difficult. You keep trying to click on the gold bars but the game thinks you're clicking on another item next to it. I feel like it's a problem that's with the Unity engine however, so not sure what more can be done.
2. Instructions are fairly bare bones and there is no real sense of reward or goal. I was hoping I might be able to see the paper people I had collected frolicking about in some storage space, but instead, they just become numbers and figures on a data screen.
3. There is not enough content here at all to warrant \$5. There are far more games on steam which have greater value for money. Don't waste your money on this.. So, uh... Is there a neutral recommendation? Seriously.. This game is really really weird. Mysterious even.. This is a great game and it has so much potential, I really recommend buying this as it is an awesome game.
